

For Oil Mixer

Oil Mixer Holder for a drum use

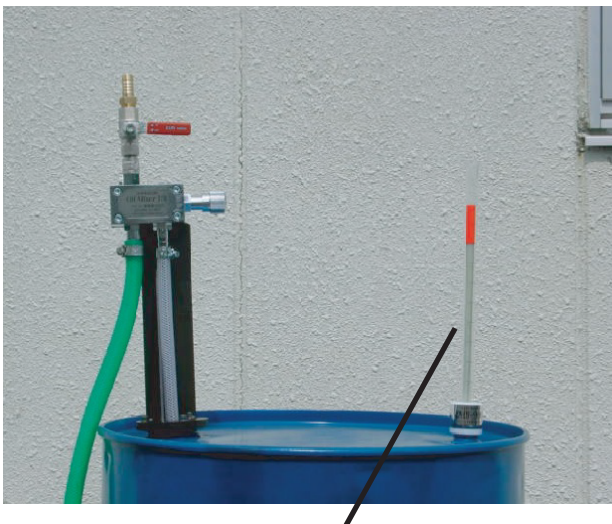

[This is a holder for the oli mixer UX to fix on a drum diectly.]

— FEATURE —

- As it just fits to the mouth of a drum steadily and stabilized.
- It can be moved to anywhere in the factory attached with the drum by drum carrier.
- As the seat and the holder are separated, being rotated at about 50° on the holding part, it can be set in the direction of your favor.

— ATTENTION —

- This holder is used only for drum cans. Please do not use it for other container nor other purposes.
- Please use the hose made with reticulation to connect water pipe and the oil mixer.
- Please do not use for other ejectors excluding the oil mixer.
- When using the drum carrier that holds a drum lying on its side, some leaking might occur if the holder is kept attaching on the drum.

Combined use of our remainder gauge, IMB900, will make your stock control much easier.
